Summary

I'm an experienced Software Engineer with more than 6 years of professional experience, proficient in Java, Spring Boot, PHP, Symfony for backend development. On the frontend, I've worked extensively with Vue.js, Nuxt.js, React.js, Next.js, and Angular, including React Native for mobile apps, also I'm interested in integrations for applications such as Salesforce, Google Maps, Open Street Maps, Here Maps, KYC, Didomi, Stripe payments, Payment gateways, AWS, SendGrid, SendBird, CDN and finally I've interesting in GraphQL, Machine learning, Penetration testing, WebSockets, mobile applications and more

Experience

Senior Frontend Developer | Codelogix | Novi Sad

Jan, 2025 - Present

Develop cross-platform mobile applications using React Native, maintain native Android (Java, Kotlin) and iOS (Swift, Objective-C) codebases, perform code reviews, contribute to the design and implementation of new application features, and more.

Project: One Tap Away Mobile App | Team Size: 20+

Role: Senior Mobile Developer

Duration: Feb, 2025 to Present

Description: The One Tap Away Mobile Application aims to deliver a seamless and intuitive platform that connects users with services and devices in just one tap. Built for both Android and iOS, it ensures broad accessibility and a consistent user experience. The application integrates with CSCSW to support collaboration and service delivery, while leveraging modern tools such as Sentry, Segment, React Query, MMKV storage and more. It features Bluetooth communication with external devices and a robust offline mode, enabling reliable performance even without network connectivity. With its modular architecture and advanced integrations, One Tap Away provides secure, scalable, and user-friendly functionality across platforms.

Project: One Tap Away Web Portal | Team Size: 20+

Role: Senior Mobile Developer

Duration: Jan, 2025 to Present

Description: The One Tap Away Web Portal is a modern, scalable platform built with React, designed to complement the mobile application by providing administrative and user-facing capabilities. It leverages React Query for efficient data fetching and state management, while AWS Amplify powers secure authentication and user login flows. The portal is styled with Tailwind CSS, ensuring responsive and visually consistent interfaces. It also incorporates JSON Schema and generic form generation, enabling dynamic, reusable, and easily maintainable input structures.

Software Engineer Lead | Lilly021 | Novi Sad

Jan, 2023 - Oct, 2024

Promoted to the position, lead in a small teams, working on React native with Expo, write swift and android codebase, publishing application on Google and Apple store and more

Project: Dealio - Digital marketplace | Team Size: 14+

Role: Mobile Technical Lead

Duration: Mar, 2023 to Sep, 2024

Description: The E-Commerce Mobile Application aims to provide a seamless and user-friendly platform for customers to browse, purchase, and manage products from their mobile devices. This application will caterto both Android and iOS users, ensuring a wide reach. It also has so many integrations like Salesforce, Google Maps, Apple Maps, Open Street Maps, Firebase, Expo, Didomi, UXCam, KYC, SendGrid, SendBird and also has integration for payment.

Skills

Programming languages:

Java, JavaScript, TypeScript, HTML, JSON, CSS (Scss, less), Basics of SQL, PHP, Basics of NoSql and more

Skills

Frameworks and libraries:

Spring boot, Micronaut, Sling, Angular, NestJS, React, NextJS, VueJs, NuxtJS, Tailwind, React Native, Expo, Flask, Express, Elysia, Symphony and more

Databases:

MySQL, MongoDB, PostgreSQL

Package Managers:

maven, npm, pnpm, gradle, composer, yarn, bun

Automation tests:

Selenium, Cucumber, Cypress

IDE-s:

IntelliJ IDEA, WebStorm, PhpStorm, PyCharm, Visual studio code

Version control:

Git, Bitbucket

Systems:

Mac OS, Linux

Other:

WebSocket, Docker, EAS, Stripe, Rest api, GraphQL, JWT, Firebase, Open Street Maps, Google Maps, AWS, Salesforce integration, Didomi, payment gateways, UXcam, SendBird, SendGrid, KYC, Detox, OAuth, Firebase notifications, Prettier, ESLint, TSLint, Huskey, Bootstrap, Material and more

I'm currently learning:

Electron, photoshop, Python (Django), Illustrator, Spring cloud, Eureka discovery server, microservice architecture, and more

Experience

Project: Dealio - Digital marketplace | Team Size: 14+

Role: Mobile Technical Lead

Duration: Mar, 2023 to Sep, 2024

Description: The E-Commerce Mobile Application aims to provide a seamless and user-friendly platform for customers to browse, purchase, and manage products from their mobile devices. This application will cater to both Android and iOS users, ensuring a wide reach. It also has so many integrations like Salesforce, Google Maps, Apple Maps, Open Street Maps, Firebase, Expo, Didomi, UXCam, KYC, SendGrid, SendBird and also has integration for payment.

Software Engineer | Lilly021 | Novi Sad

Dec, 2020 - Jan, 2023

Developed in Symfony, React Native, Android, Spring Boot, Sling, ReactJS, VueJS, worked in AEM, Cucumber, jQuery, code reviewer and more

Project: Adobe | Team Size: 20+

Role: Software Engineer

Duration: Jun, 2022 to Mar, 2023

Description: Adobe Experience Manager (AEM) is a content manager solution for creating, managing, and optimizing digital content across various platforms. It's used to build websites, mobile apps, and forms, making it easier to handle marketing content and assets. We have integrated various services and utilized different technologies, including jQuery, VanillaJS, NuxtJS, ReactJS, Spring Boot external services, to enhance its capabilities. We also write codebase in Java Sling.

Project: Co-Museum | Team Size: 5

Role: Frontend Engineer

Duration: Apr, 2022 to Jun, 2022

Responsibilities:

- Responsible for create UI components and connect to Solidify backend
- Responsible for SSR (Server Side Rendering)

Tech stack: ReactJS, Figma, NextJS, Web3, Solidity, Metamask, NFT

Project: Managevio | Team Size: 5

Role: Software Engineer

Duration: Nov, 2021 to Apr, 2022

Description: Managevio is a comprehensive project management tool designed to help businesses streamline their operations by consolidating project details, tracking progress, and staying organized. Developed by Lilly021, it allows users to manage their projects efficiently, ensuring they stay on top of deadlines and tasks in a centralized space. The platform provides features like real-time progress tracking and an intuitive interface to keep all stakeholders informed and organized

Project: FakeInterview | Team Size: 5

Role: Software Engineer

Duration: Feb, 2022 to Apr, 2022

Description: Fake Interview is a platform that allows you to simulate a job interview with a mentor who is an expert in your career field.

Project: ZapMap | Team Size: 10

Role: Android Developer

Duration: Jun, 2021 to Nov, 2021

Description: It's a popular app in the UK that helps electric vehicle (EV) drivers locate and navigate to nearby charging points. Zapmap provides detailed information about each charging station, including location, charging speed, fees, and real-time availability. It's a handy tool for planning longer journeys and ensuring you have access to charging facilities along the way.

Experience

Project: Shapp | Team Size: 5

Role: Full Stack Developer

Duration: Dec, 2020 to Jun, 2021

Description: Shapp.co is a platform designed to help people give away or lend items they no longer need. It promotes sustainability by encouraging users to share and reuse items instead of discarding them. You can list items you want to give away or lend, and others can claim or borrow them, making it a great way to reduce waste and help others.

Summary

Full Stack Developer | Convolute | Novi Sad

Aug, 2019 - Oct, 2020

Developed in Spring Boot, Angular, wrote automation tests in Selenium, Stripe and more

Full Stack Developer | Semantic | Novi Sad

July, 2018 - Aug, 2019

(I worked at a Semantic that acted as an intermediary, and then we all transitioned to the main parent company.

We simply became Convolute and I worked on same projects)

Project: TimeOff | Team Size: 2

Role: Full Stack Developer

Duration: Aug, 2020 to Oct, 2020

Description: Software Solution for employees to request vacation.

With this combination of technologies, the portal delivers a streamlined, user-friendly experience and supports rapid feature development and customization.

Project: CreditFolio | Team Size: 5

Role: Full Stack Developer

Duration: Aug, 2020 to Oct, 2020

Description: CreditFolio is a Swiss-based crowdlending platform that was established in 2017. It aims to simplify the borrowing and lending process by connecting borrowers directly with investors, bypassing traditional banking institutions. The platform offers a streamlined and efficient way for individuals and businesses to obtain loans, often with more favorable terms than those offered by banks.

Project: TimeOff | Team Size: 2

Role: Full Stack Developer

Duration: Aug, 2020 to Oct, 2020

Description: Software Solution for employees to request vacation. With this combination of technologies, the portal delivers a streamlined, user-friendly experience and supports rapid feature development and customization.

Project: MSNet | Team Size: 5

Role: Full Stack Developer

Duration: Jul, 2018 to Oct, 2020

Description: The Solution system for administering TV subscriptions also manages customer interactions, processes payments, and generates monthly bills for each customer. It includes numerous cron jobs for bill creation and bank payment processing. The system integrates with various services such as Stripe, FlyWay, and JasperReports. Additionally, it implements WebSockets to display the processing of monthly, quarterly, and semi-annual financial reports. Automation tests are implemented using Selenium.

Project: CreditCalculator | Team Size: 5

Role: Full Stack Developer

Duration: Aug, 2019 to Mar, 2020

Description: CreditCalculator is a tool used to calculate loan details such as monthly installments, interest rates, and total loan costs. Various Swiss financial services offer these calculators to help users understand the financial implications of taking out a loan.

Full stack developer | IT Intern | Levi9 | Novi Sad

May, 2018

Hackaton | Levi9 - 5 days on Java | Novi Sad

Nov, 2017

Personal projects:

- NgTyped (Angular Typescript) - It is typing animation component based on typical
- NgMultiselect (Angular Typescript) - It is component dropdown for web applications that can easily be used and integrated, and it can be bound to any data source
- Personal website or Portfolio (NextJS) - <https://vladimirantin.hok.rs>
- Spring Core - It is a library for Spring Boot. It is a code generator that automates the creation of repositories, services, converters, controllers, and DTOs based on models and annotations. It also supports annotations for database change tracking (Audit) and simplifies JWT security implementation with a single annotation.
